- Factory assembled, leak-tested, and calibrated
- Full breadth of offering including integral, conventional, and inline designs
- Integral design enables "flangeless" valve integration
- 2, 3, and 5 valve configurations
- Compact, lightweight design
- · Easy in-process calibration
- Direct-mount capability

## **Rosemount Manifolds Selection Guide**

# ROSEMOUNT 304 CONVENTIONAL MANIFOLD

See "Options" on page 27.

- · Attaches to transmitter flange
- 2, 3, and 5-valve configurations
- Traditional (Flange x Flange, Flange x NPT) & Wafer styles
- Factory assembled, seal-tested, and calibrated

Rosemount 304 Conventional Manifold-Traditional Style

Rosemount 304 Conventional Manifold-Wafer Style

#### **ROSEMOUNT 305 INTEGRAL MANIFOLD**

See "Options" on page 27.

- Assembles directly to transmitter, eliminating need for flange
- 2, 3, and 5-valve configuration
- Available in Coplanar<sup>™</sup> and traditional styles
- Compact, lightweight assembly
- Factory assembled, seal-tested, and calibrated
- 50% fewer leak points than conventional transmitter / flange / manifold interface

**Rosemount 305 Integral Manifold Coplanar Style** 

#### **ROSEMOUNT 306 INLINE MANIFOLD**

See "Options" on page 27.

- Assembled directly to inline pressure transmitters
- Block-and-Bleed and 2-valve configurations
- Male or Female threaded NPT process connection

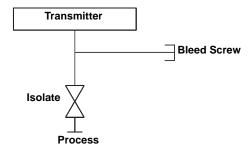

Rosemount 306 Inline Manifold

## **Valve Configuration**

#### **BLOCK-AND-BLEED**

The block-and-bleed configuration is available on the Rosemount 306 Manifold for use with inline gage and absolute pressure transmitters. A single block valve provides instrument isolation and a plug provides drain/vent capabilities.

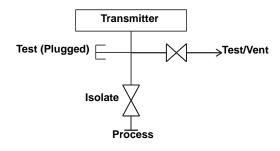

#### 306 Manifold

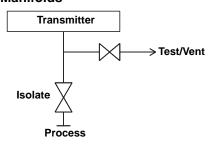

#### **TWO-VALVE**

The two-valve configuration is available on Rosemount 304, 305, and 306 Manifolds for use with absolute and gage pressure transmitters. A block valve provides instrument isolation and a drain/vent valve allows venting, draining, or calibration.

#### 304 Manifold

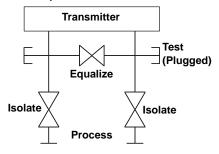

#### 305 & 306 Manifolds

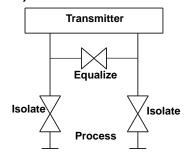

#### THREE-VALVE

The three-valve configuration is available on Rosemount 304 and 305 Manifolds for use with differential pressure and multivariable transmitters. Two block valves provide instrument isolation, and one equalize valve is positioned between the high and low transmitter process connections.

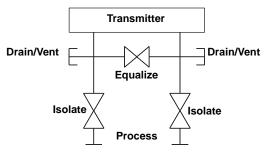

#### 304 (Traditional) Manifold

#### 304 (Wafer) Manifold

#### 305 Manifold

#### NOTE

Test/Vents receive plastic caps to protect threaded connections unless otherwise noted.

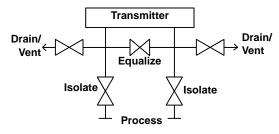

#### NOTE

Test (Plugged) connections receive ¼-in. NPT plugs unless otherwise noted.

#### **FIVE-VALVE**

The five-valve configuration is available on Rosemount 304 and 305 Manifolds for use with differential pressure and multivariable transmitters. Two block valves provide instrument isolation and one equalize valve is positioned between the high and low transmitter process connections. In addition, two drain/vent valves allow for controlled venting, 100% capture of vented or drained process, and simplified in-process calibration capability.

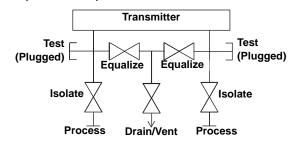

#### 304 (Wafer) & 305 Manifolds

#### FIVE-VALVE NATURAL GAS

The five-valve natural gas configuration is available on the Rosemount 304 and 305 Manifolds for use with differential pressure and multivariable transmitters. Two block valves provide instrument isolation and a single drain/vent valve allows for controlled venting, 100% capture of vented or drained process, and simplified in-process calibration capability. In addition, two equalize valves provide extra protection from leaking to ensure DP signal integrity.

#### 304 (Traditional) & 305 Manifolds

#### NOTE

Test/Vents receive plastic caps to protect threaded connections unless otherwise noted.

#### NOTE

Test (Plugged) connections receive ¼-in. NPT plugs unless otherwise noted.

00813-0100-4733, Rev NB January 2011

## **Ordering Information**

Rosemount Manifolds can be ordered as a stand-alone product or as an integrated assembly that is attached to a transmitter.

#### Stand-Alone Manifold:

- 1. Reference the "Rosemount Manifolds Selection Guide" (see page 2) for assistance on choosing the type of manifold needed.
- 2. Specify a completed model number by referencing the applicable ordering table for the selected manifold type:
  - a. Rosemount 304 Conventional Manifold, see page 6.
  - b. Rosemount 305 Integral Manifold, see page 8.
  - c. Rosemount 306 Inline Manifold, see page 10.

#### **Transmitter / Manifold Assembly:**

- 1. Specify a completed Rosemount transmitter model number by referencing the applicable product data sheet.
- 2. Specify a completed manifold model number by referencing the applicable ordering table for the selected manifold type:
  - a. Rosemount 304 Conventional Manifold, see page 6.
  - b. Rosemount 305 Integral Manifold, see page 8.
  - c. Rosemount 306 Inline Manifold, see page 10.
- 3. Verify the transmitter model number contains the correct "Process Connection" code or "Manifold Option" code for the desired transmitter manifold assembly (see Table 1).

Table 1. Ordering Codes for a Transmitter / Manifold Assembly

| Transmitter    | Manifold | Process Connection Code | "Manifold" Option Code |
|----------------|----------|-------------------------|------------------------|
|                | 304      | A12                     | _                      |

- (1) Only allowed with Material of Construction code 2.
- (2) Not available with Wafer Manifold Style code W.
- (3) Not available with Traditional Manifold Style code T.
- (4) Only available with 316 SST materials of construction code 2 and graphite based packing code 2.
- (5) Only allowed with both Manifold Style code T and Process Connection code F. Not allowed with Graphite-based Packing Code 2.
- (6) Not available with Manifold Type codes 7, 8.
- (7) Materials of construction comply with recommendations per NACE MR 0175 / ISO 1516 for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR 0103 for sour refining environments.
- (8) Not available with Graphite-Based Packing Material code 2.

| Typical Cop                                                                | olanar Integral Manifold Model Number: 305RC32B11B4 |          |
| Typical Tran                                                               | nsmitter Model Number: 3051CD2A02A1AS5              |          |

- (1) Not available with traditional manifold style T.
- (2) Only available with Coplanar manifold style code C.
- (3) Only available with 316 SST materials of construction code 2 and graphite based backing code 2.
- (4) Materials of Construction comply with recommendations per NACE MR 0175/ISO 15156 for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR0103 for sour refining environments.
- (5) Only available with traditional manifold style codes T and M.
- (6) Not available with traditional manifold style code M.
- (7) Includes graphite tape on drain/vent valves and plugs.
- (8) Not compatible with the Rosemount 3095 transmitter.
- (9) Not available with ASME B31.1 manifold type codes 7, 8, and 9.
- (10) Not available with Graphite-Based Packing Material code 2.
- (11) Only available with 316 SST Materials of Construction Code 2: 316 SST body and bonnets; Alloy C-276 stems, tip/balls, and drain/vents.
- (12) Only allowed with Manifold Style code T. Not allowed with Graphite-Based Packing code 2.
- (13) Only available with traditional manifold style code M.

- (1) Only available with 316 SST materials of construction and graphite-based packing.
- (2) Not available with block-and-bleed manifold type
- (3) Materials of Construction comply with recommendations per NACE MR0175/ISO 15156 for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR0103 for sour refining environments.
- (4) Includes graphite tape on plugs.
- (5) Not available with Graphite-Based Packing Material code 2.
- (6) Only available with 316 SST material of construction code 2. Manifolds with SG option are built with 316 SST body and bonnets; Alloy C-276 stems, tips/balls.

## **Materials of Construction - Typical**

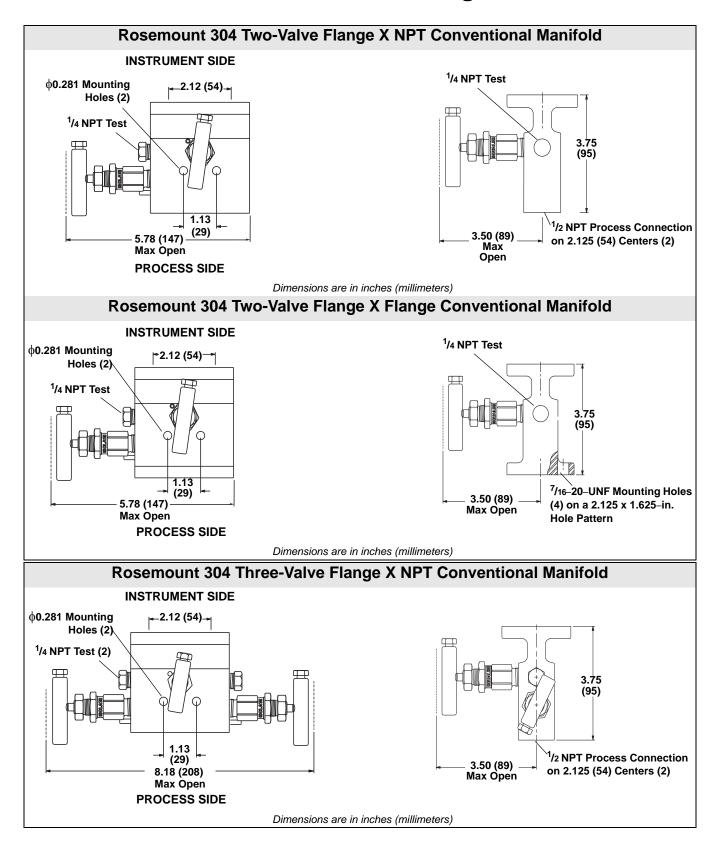

Figure 6. Typical Rosemount Manifold Valve

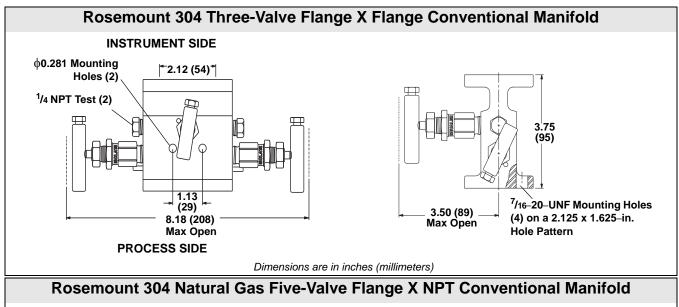

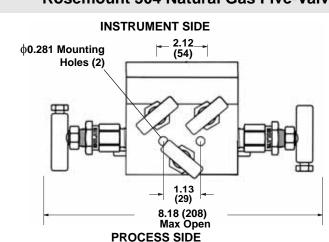

### **Estimated Weight**

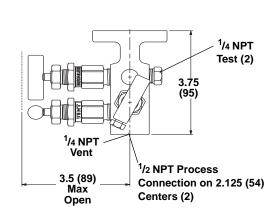

| Model and Description               | Weight           |
|-------------------------------------|------------------|
| 304                                 |                  |
| 2-valve traditional flange x NPT    | 5.0 lbs (2.3 kg) |
| 2-valve traditional flange-x flange | 5.5 lbs (2.5 kg) |
| 3-valve traditional flange x NPT    | 5.2 lbs (2.4 kg) |
| 3-valve traditional flange x flange | 5.7 lbs (2.6 kg) |
| 3-valve wafer flange x NPT          | 4.0 lbs (1.8 kg) |
| 5-valve wafer flange x NPT          | 5.7 lbs (2.6 kg) |
| 5-valve traditional flange x NPT    | 5.7 lbs (2.6 kg) |
| 5-valve traditional flange x flange | 5.7 lbs (2.6 kg) |
| 305                                 |                  |
| 2-valve Coplanar                    | 4.5 lbs (2.0 kg) |
| 2-valve traditional                 | 6.0 lbs (2.7 kg) |
| 3-valve Coplanar                    | 4.7 lbs (2.1 kg) |
| 3-valve traditional                 | 6.0 lbs (2.7 kg) |
| 5-valve Coplanar                    | 6.5 lbs (3.0 kg) |
| 306                                 |                  |
| Block-and-Bleed                     | 1.1 lbs (0.5 kg) |
| 2-valve                             | 2.5 lbs (1.1 kg) |

## **Dimensional Drawings**

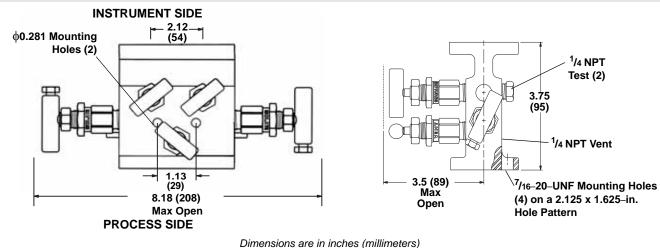

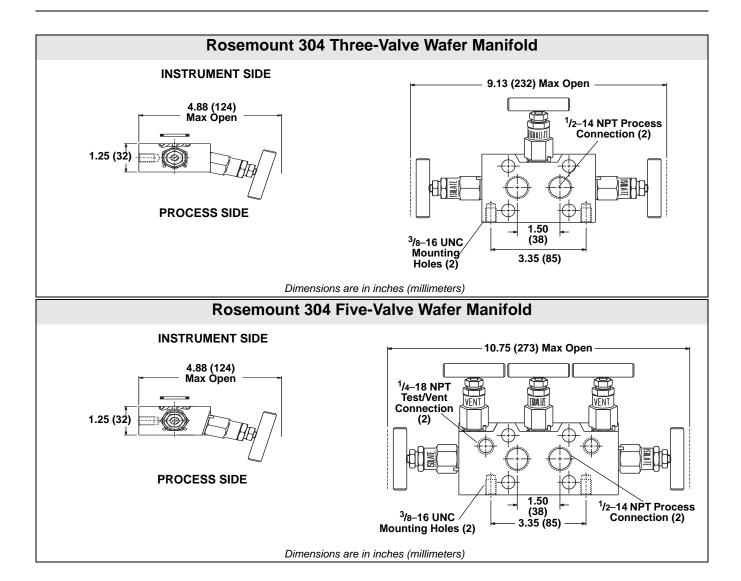

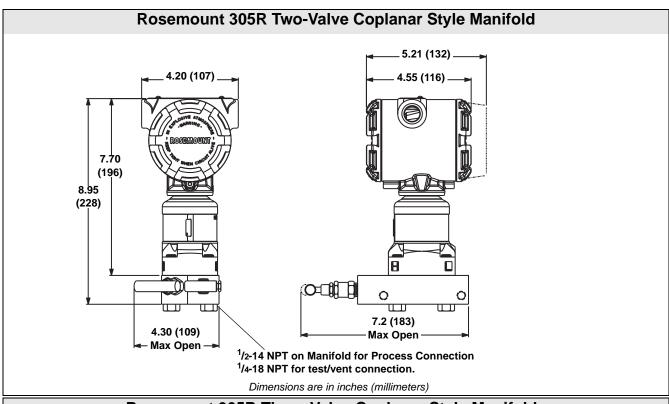

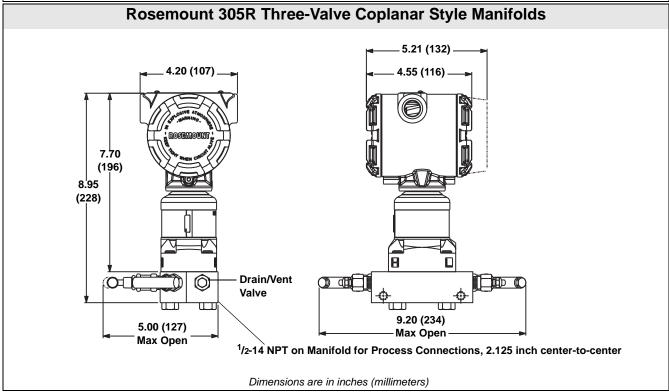

Dimensions are in inches (millimeters)

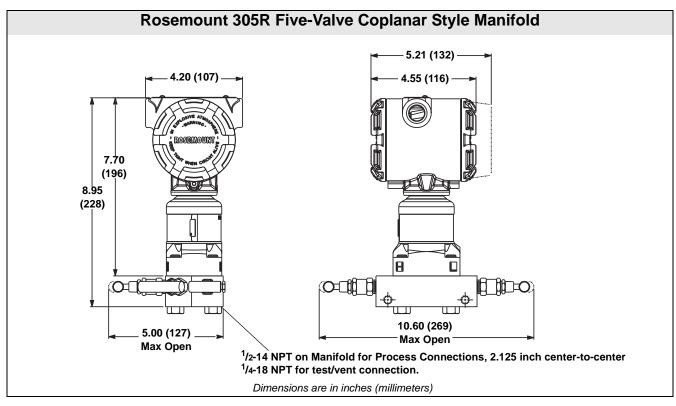

## Rosemount 304 Natural Gas Five-Valve Flange X Flange Conventional Manifold

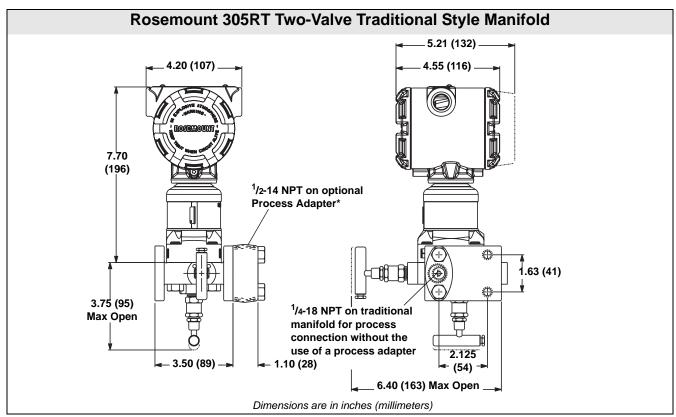

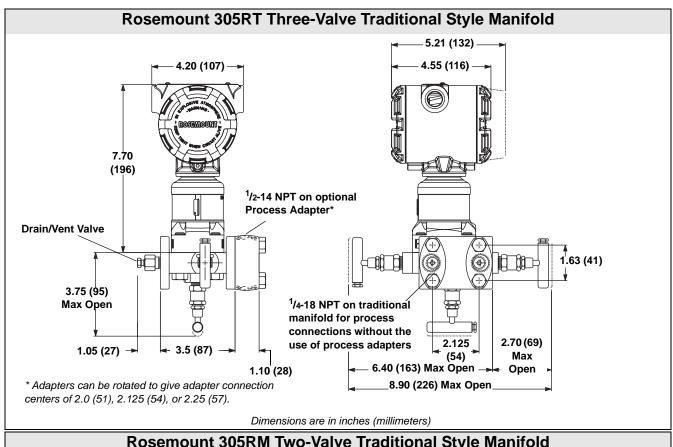

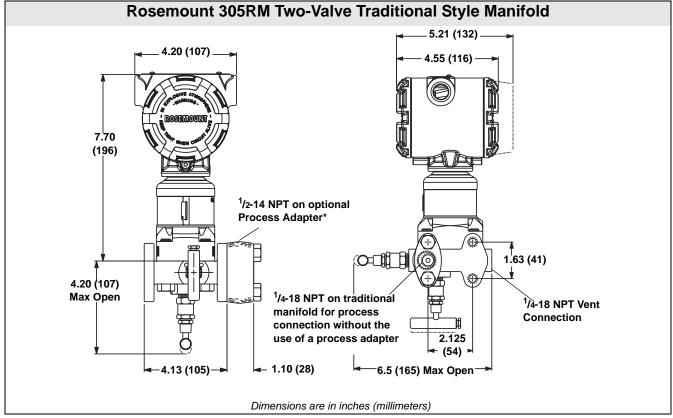

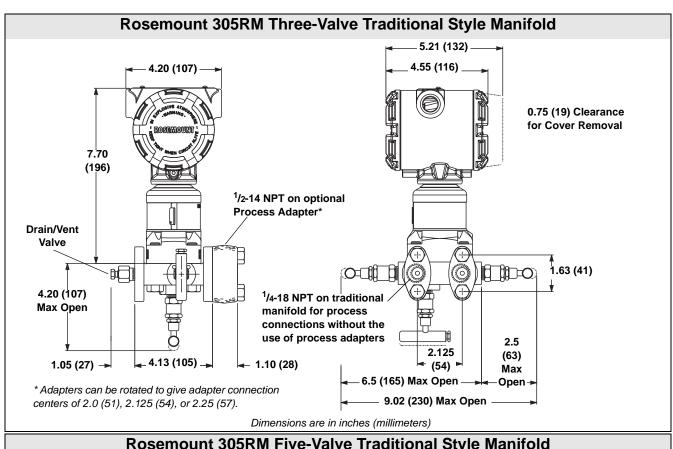

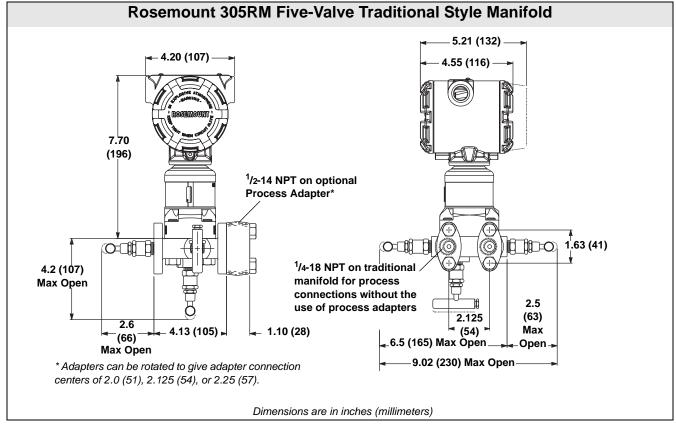

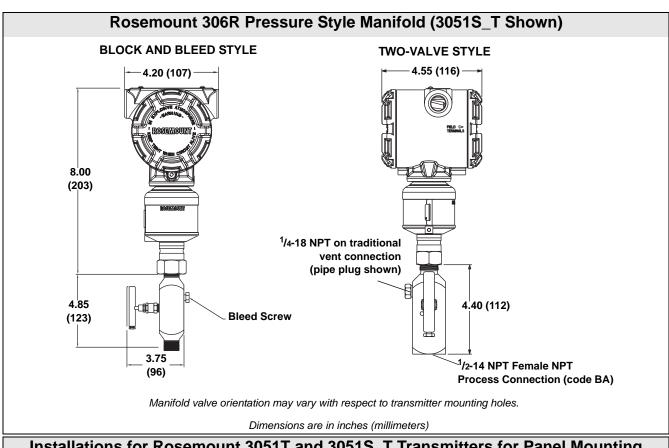

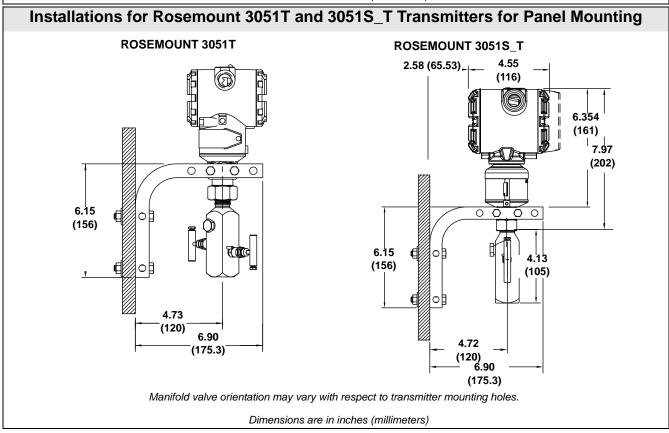

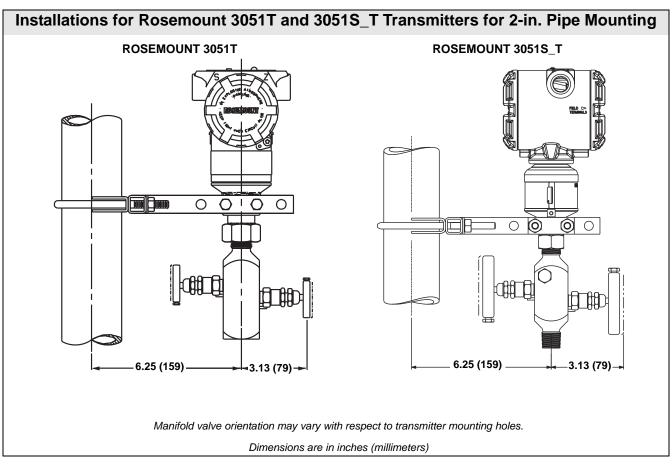

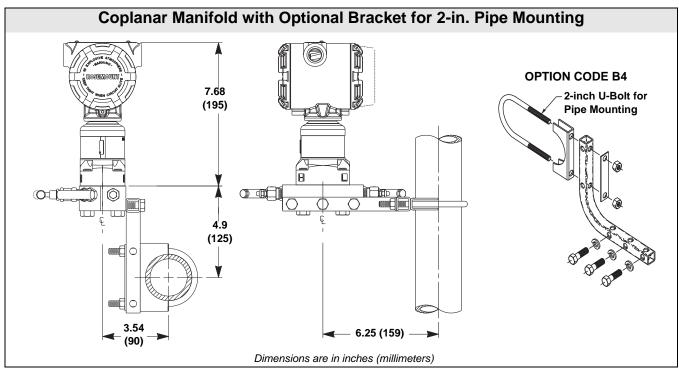

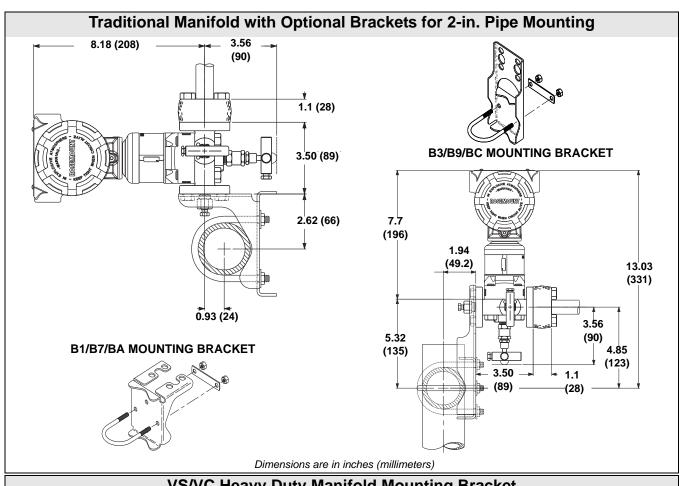

January 2011

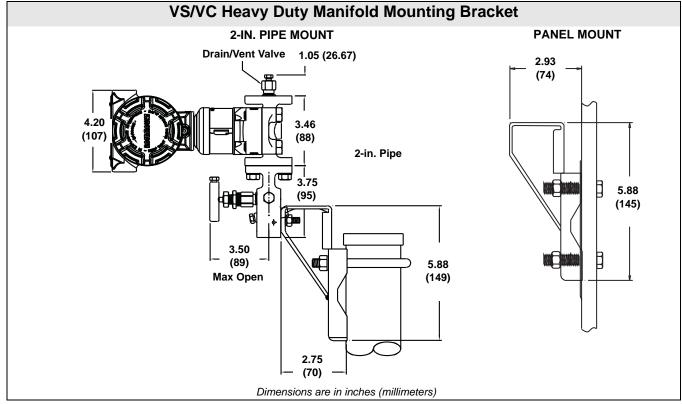

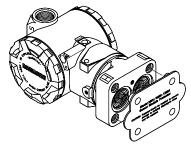

#### **OPTIONS**

#### **Module Guard**

A sensor module guard is available to protect the transmitter process isolating diaphragms. This guard should be used whenever the transmitter is removed from the integral manifold to avoid damage to the isolating diaphragms.

• Part number: 00305-1000-0001 (5/pack)

### P2 Cleaning for Special Services

Per ASTM G93-96, this option minimizes process contaminants by cleaning wetted surfaces with a suitable detergent.

#### **SG Sour Gas**

Materials of Construction comply with recommendations per NACE MR 0175/ISO 15156 for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR0103 for sour refining environments.

#### **Heat Block Kits**

Rosemount 304 Manifolds are available with steam heat block kits for cold environments and services. The steam block attaches directly to the manifold to prevent the process from freezing.

### **ASME B31.1 Power Piping Code**

Rosemount Manifolds are available in configurations that meet the requirements of the ASME B31.1 Power Piping Code. This code specifies design criteria for most air, gas, steam, water, and oil systems used in electric generating systems, central and district heating systems, industrial power plants, and geothermal plants. ASME B31.1 includes requirements for manifolds, valves, and piping. Transmitters and other measuring devices do not fall within the scope of this code.

### Marking

Manifolds are tagged with a part number, schematic drawing, temperature, and pressure limits.

#### Other Publications

For additional information, go to www.rosemount.com.

### **SPARE PARTS LIST**

Table 13. Rosemount 304 Conventional Manifold

| Part Description                                   | Part Number (Traditional Style) | Part Number (Wafer Style) |
|----------------------------------------------------|---------------------------------|---------------------------|
| Mounting Brackets (qty. 1)                         |                                 |                           |
| Manifold Heavy Duty Mounting Bracket, CS           | 01166-8005-0002                 | NA                        |
| Manifold Heavy Duty Mounting Bracket, SST          | 01166-8005-0001                 | NA                        |
| Manifold SST Mounting Bracket for 2-in. Pipe Mount | NA                              | 00305-0405-0001           |
| O-Rings (set of 12)                                |                                 |                           |
| Manifold-to-Flange O-Ring, Glass-filled PTFE       | 03031-0019-0003                 | 03031-0019-0003           |
| Manifold-to-Flange O-Ring, Graphite-filled PTFE    | 03031-1302-0002                 | 03031-1302-0002           |
| Manifold-to-Flange Bolt Kits (set of 4)            |                                 |                           |
| Consult factory for part numbers                   | Consult Factory                 | Consult Factory           |
| Heater Block Kits (qty. 1)                         |                                 |                           |
| Steam Block Kit                                    | 00305-0406-0001                 | NA                        |

Table 14. Rosemount 305 Integral Manifold

| Part Description                                         | Part Number (Traditional Style) | Part Number (Coplanar Style) |
|----------------------------------------------------------|---------------------------------|------------------------------|
| Mounting Brackets (qty. 1)                               |                                 |                              |
| Manifold SST Mounting Bracket for 2-in Pipe Mount        | NA                              | 00305-0405-0001              |
| Bolt Kits (set of 4)                                     |                                 |                              |
| CS Bolt Kit                                              | 03031-0312-0001                 | 03031-0311-0001              |
| SST Bolt Kit                                             | 03031-0312-0002                 | 03031-0311-0002              |
| ANSI/ASTM-A-193-B7M Bolt Kit                             | 03031-0312-0003                 | 03031-0311-0003              |
| Drain/Vents (qty. 1)                                     |                                 |                              |
| 316 SST Drain/Vent for use with 3-valve 305 Manifold     | 01151-0028-0012                 | 01151-0028-0012              |
| Alloy C-276 Drain/Vent for use with 3-valve 305 Manifold | 01151-0028-0013                 | 01151-0028-0013              |
| Coplanar Flange Kits (qty. 1)                            |                                 |                              |
| Differential Flange Kit, SST                             | NA                              | 00305-1001-0001              |
| Gauge Flange Kit, SST                                    | NA                              | 00305-1001-1001              |
| O-Rings (set of 12)                                      |                                 |                              |
| Manifold-to-Module O-Ring, Glass-filled PTFE             | 03031-0234-0001                 | 03031-0234-0001              |
| Manifold-to-Module O-Ring, Graphite-filled PTFE          | 03031-0234-0002                 | 03031-0234-0002              |
| Sensor Guard (set of 5)                                  |                                 |                              |
| Coplanar Module Sensor Guard                             | 00305-1000-0001                 | 00305-1000-0001              |
